Steps to Capturing Patient Wristband:

Step #1
The Patient Wristband button is located in the narrative tab of the EPCR.

Step #2
Select the Hospital destination

Step #3
Tap the Patient Wristband button.
Step #4

The camera screen will open and will automatically capture barcode once it is able to get into focus.

IMS will only accept the patient barcode into the system. Scanning any other barcode will result in an error message.

Step #5

Complete documentation and sync as normal.
