Pharmacy Residency Programs
Mission Statement

The Mission of the Summa Health System Pharmacy Residency Programs is to:

- Train effective, confident, compassionate, and proficient direct patient care providers
- Instill strong workplace values of idealism, professionalism, excellence, and integrity
- Promote and transform the practice of pharmacy in our community, state and country

About Summa Health

Summa Health is a patient-centered population health management organization that provides integrated and coordinated care and a superior experience for the people of Northeast Ohio. The system encompasses a network of hospitals, community-based health centers, a health plan, a multi-specialty group practice, an accountable care organization, research and medical education, and a foundation.

We serve more than one million patients each year in comprehensive acute, critical, emergency, outpatient and long-term/home-care settings and represent more than 1,300 licensed inpatient beds at Summa Health System – Akron, Barberton and Summa St. Thomas Campuses and Summa Rehab Hospital.

Summa Health trains physicians and pharmacists through 14 residency programs and 7 fellowships. As a mid-sized institution specializing in community-based education, you will get the best of both worlds: a high volume of direct patient contact, plus the academic rigor that supports research, interprofessional education, and quality improvement projects.

About the Pharmacy Department

The pharmacy at Summa Health employs more than 100 pharmacists, residents, pharmacy interns, and other support personnel whose priority is to provide high-quality, cost-effective pharmaceutical care to patients with the ultimate goal of optimal patient care.

The pharmacy department is a 24-hour operation responsible for dispensing medications daily for an average inpatient population of 450 patients with additional services provided in the outpatient setting. Clinical services provided include renal drug monitoring, drug interaction monitoring, patient care rounding, medication teaching, therapeutic drug monitoring, Meds-To-Beds, specialty pharmacy, drug order review, drug information support for care providers and a focus on an integrated, decentralized model for care delivery. Additionally, the department provides a variety of educational programs to pharmacy, medical and nursing personnel.

The pharmacy provides specialized pharmacy clinical services in the areas of Ambulatory Care, Anticoagulation, Antimicrobial Stewardship, Cardiovascular Care, Emergency Medicine, Geriatric Care, Hematology/Oncology, Hospice, Infectious Disease, Internal Medicine, Intensive Care, Medication Safety, Neurology, Pain Management, Palliative Care, Psychiatric Care, and Transitions of Care.
Description of the Pharmacy Residency Programs

Residency training takes place primarily at the Akron Campus. The resident will gain experience through a number of clinical rotations, and learn through interactions with a multi-disciplinary team of health professionals devoted to providing optimal care to patients with various disease states and a range of complexity of patient problems.

The resident will gain experience in dealing with issues impacting pharmacy practice today. Training will provide clinical, operational and management strategies designed to provide safe and cost-effective use of medications. Participation in ongoing medication use evaluation programs and formulary activities is required.

The Department of Pharmacy Services has a longstanding history of excellence in Pharmaceutical Care and Research. Therefore, learning will include a focus on the mission of the department, current services, short and long-term goals and policies concerning medication use. The resident will have the opportunity to complete a research project with the advantage of having access to a diverse patient population, experienced preceptors, and well established Research Department at Summa. Research results will be submitted for presentation at professional meetings and for publication.

Our pharmacists are widely involved in teaching pharmacy students as an Advanced and Introductory Pharmacy Practice Experience training site for several colleges of pharmacy. The resident will have the opportunity to assist with clinical training of pharmacy students in these programs. The opportunity to obtain a teaching certificate is also available through the Northeast Ohio Medical University.

Program Details

Demographics
Duration: 12 months
Available Positions:
- PGY1 Pharmacy Practice
- PGY2 Ambulatory Care
- PGY2 Pain Management & Palliative Care
Starting Date: July 1
Application Deadline: January 1

Benefits
Estimated Stipend:
- PGY1 - $48,900
- PGY2 - $49,421
Medical coverage and free parking
Paid time off and no holiday staffing
Office space and computer
Reduced professional membership fees and continuing pharmacy education
Travel reimbursement
