

Making an Impact on the Community in 2024

Social drivers of health (SDoH) are the conditions in the environments where people are born, live, learn, work, play, worship and age that affect a wide range of health, functioning and quality-of-life outcomes and risks.

At Summa Health, we are committed to addressing SDoH in our community to advance health equity and remove barriers to care to empower each person to live their healthiest life.

Interconnectedness
